Quick Guide

Plug earphone into the jack on bottom right of your device then slide the power switch to right to turn the player on.

Each time you tap the button , it will bring you to one of its nine different functions, including Music, Bluetooth, FM Radio, Set, Recordings, Folder view, Tools, Pictures, and EBook.

Note: the player will switch to sleep (stand-by) mode if inactive for a few seconds. And you can hold the central button for about 3 seconds to wake up the player.

When it' s on music/FM radio/recording playing interface, tap the button  to back to last grade; in other interface, tap the icon to scroll down.

Power On and Off

Turn the slider switch(Main Power) at the bottom of the player to to right.

1. Standby mode. While the slider switch in ON position, pressing the central button for about 3 seconds to turn off your player. Please kindly note, the device is not really powered off but fallen into standby mode, and the battery will be consumed still. To turn off your player totally, please turn the slider switch(Main Power) at the bottom of the player to to the left.
2. If you have been fallen into standby mode with the slider switch in ON position, you can wake up the unit by pressing the center button for three seconds.

Note: If you cannot switch the player on, please make sure the slider switch is in ON position (right side).

Charging the Battery

1. Plug one end of the provided micro USB cable into the USB port of a computer, plug the other end into the micro USB port on your device. It will start charging automatically.
2. You can also charge the device via chargers. Please kindly note that the chargers should meet standards: input: AC110-240V 50/60Hz Max: 100mA; output: DC5.0-5.5V 500mA-800mA.

Transfer Files to Your Player

1. Connect your device to the computer with the enclosed Micro USB cable the mp3 player will show up as a removable disk as soon as the computer recognize it and then just drag files into the mp3 player. If your computer

cannot recognize the player, the enclosed Micro USB lead may has problem please use another Micro USB lead to connect it to your PC.

2. When your device is showed as a removable disk, you can put the files saved on your computer to your player. When the slider is "off" the unit will power up when connected to a USB port, and then go dead when disconnected. Slide the switch of the opposite position it will power up OK.

Play Your Music

Selecting the Music icon on main screen with central button, and then a related list will show as " All songs" , "Artist" , "Albums" , and "Genres" etc.

Choose and adjust according to your need.

Main

1. Return to main screen

When the player is on music playing screen, there are two ways for you to return:

- Press the menu button, a related list will show with the item "Back to Home" , choose it and then you will return to the main screen
- Press the back button to return to the last grade, then tap the button  continually to return to the main screen.

2. Rewind/Forward

Support and Troubleshooting

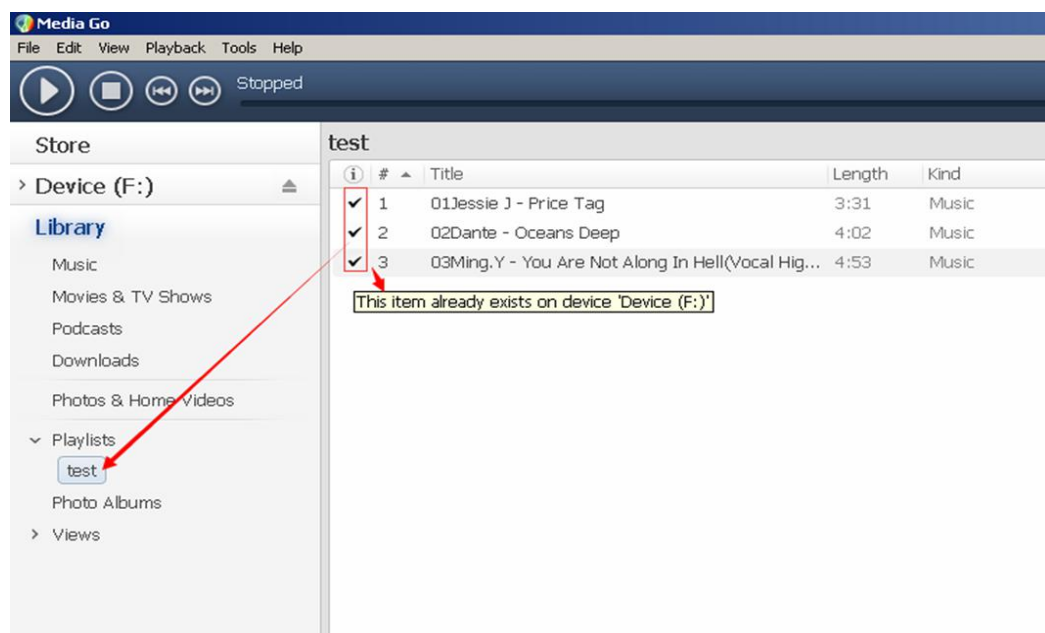

1. How to use the playlist

- To use the preset playlist.

Press the button and then choose the option “Add to playlist” for the song you want to operate. There are 3 items prepared for you, including “Playlist on the go [1]”, “Playlist on the go [2]” and “Playlist on the go [3]”, you can add the song to any one of these three as you like.

- To create the playlist by yourself

Editing Playlist by media player could be painful, no matter by iPod or others. There is a free program called Media Go. It's the easiest program to use for transferring playlists to the AGPTek. Just create your playlists in Media Go and then right-click its name and select 'Add playlist to X :(Which is your MP3 player's disk) '. (You can download it at <http://mediago.sony.com/enu/>) After sending your playlist and music to the player, you may find it in "Music" .

2. If the device is frozen, turn it off and then restart

3. If the device doesn' t turn on

- Turn the slider power switch to off (left).
- Connect the player to your computer.

If the player still can' t be used after charging, please contact with our customer service.

4. Serious Noise

- Dirt will cause noise. Inspect the headset and clean if necessary.

- A damaged music file may cause serious noise. Try another song to test.

5. No sound heard from headset

- Please check whether the voice volume is setting up at 0.
- Please check if there is any problem about the headset connecting.
