# AGPTek A06 Bluetooth Music Player Quick Start Guide

Please contact us, when anything comes to your mind, we urge to turn this little thing into the best music player in the world and in your hand. The player you receive is the latest version, the way to set up Bluetooth is a bit different from the previous version，please refer to the chapter 'Play by Bluetooth' for details.

Index

Quick guide

1. Plug Earphone into jack on bottom right of machine then turn power switch to on and AGPtEK will show on screen.

2. Each time you push the button ⫦ , it will bring you to one of its 11 different functions, including Music, Video, Recordings, Pictures, FM Radio, EBook, Folder, Tools, Setting, and Bluetooth and now playing.

3. Select the icon Music and push the button VOL , a new list will appear showing the following: All songs, update card data, artists, albums, genres, play lists, album art, local folder and card folder.

4. Move to Local folder and Push the center button a new screen will appear showing: Repeat all songs and list of songs if there is more than one song. Then push-(Center button) on repeat all songs the first song will start playing.
Charging the Battery

1. Plug one end of the micro USB cable into the USB port of a computer or into the mains

    plug.

2. Plug the other end of the

    cable into the micro USB port

    on your device.

3. When the device is fully

    charged, disconnect the cable

    from your device by pulling it straight outward.

Note: Please turn the slider to 'on' and it will let you know when it is fully charged.

(When the player is under charging and the slider is set to 'off', the player still shows it is

charging even your device is fully charged already.)
Power On and Off

You can turn your player on and off through the switch button and the central button

1. Turn the slider switch to on , the player will power up.

2. When the slider switch is turned to on, it will be turned on / off by pressing the center

    button for three seconds.

3. When the player is on the song playing screen, press the button VOL and then press the

    center button to turn off it. The next time you switch back on the player, it will start

    from the last position it left off.

Note: If you cannot switch on the player, please check if you turn the switch to on.

Play Your Music

Key's function under music play screen

Hold the left key to fast rewind, tap to the previous track

Tap to show displays menu related to playing music (Play Mode, Sound Settings, Add to List, Remove from List, Delete, and Book Marks)

Tap the bottom Key and then repeatedly tap the Left Key to get back to Main Menu

Hold the right key to fast forward, tap to the next track

- If the MP3 player is in music playing or FM radio interface, tap VOL button, and then use left double arrow key to go back to main menu.

- Hold the button M to lock the player and hold the button M again to unlock it.

Note: that you cannot fast forward or rewind under Bluetooth mode

1. Play mode

There are two play modes of this MP3 player: easy mode and normal mode. When the player is on the song screen, it comes to easy mode by pressing the center button. The MP3 player comes back to normal mode by pressing the center button again.

2. Volume control

- In normal mode, press and hold VOL until the volume screen appears and then use M and VOL to adjust the volume.

- In easy mode, press M and VOL to adjust the volume.(Please press the VOL button first to avoid locking your player)

1. Shuffle and repeat

● Shuffle

You can choose the song from "Music" or "Folder" to get into the music playing screen and then push the button M, you will find the item "Shuffle" under "Play mode".

Note: if you play the song through "Music", it will only shuffle the songs in the folder which your music is included. If you play the song through "Folder", it will shuffle songs by folder. In Bluetooth mode, the shuffle option only works in an individual folder, it will shuffle each folder one by one. It cannot shuffle all the songs.

● Repeat

You can repeat your songs from the music playing screen by pressing the button M> "Play mode" > "Repeat". The player would only play the first 10 seconds of a track and then skip if you select option "View playing".

Note: if you play songs through "Music", it will only repeat in the folder which your songs is included. If you play songs through "Folder", it will repeat by folder with the option "Repeat all".

3. Resume playback

Press VOL to exist from the song screen and then push the center button for three seconds to switch off the player, the next time you turn on the player it will start from where you left off.

5. Back to another screen

Tap left double arrow key to return to last menu. If the MP3 player is in music playing or FM radio interface, press VOL button, and then use left double arrow key to go back to last menu. Long press center button to turn off/on the player.
Play by Bluetooth

1. Turn on your BT device and make sure it is under paring mode. Please kindly note that for some Bluetooth speaker and lots of Bluetooth headphones, only when the LED flash red and blue at the same time, it is under pairing mode.

2. Then access Bluetooth icon on the AGPtek MP3 player and the player will display 'please wait' and it comes to 'Bluetooth device list' screen. The screen will be indicated by moving dots, which means the player is searching Bluetooth device.

3. The Bluetooth device will show up on the AGPtek MP3 player a few seconds later. As soon as it shows up on the player, select the device and select 'Connect Bluetooth', then the player will display 'please wait' and 'Bluetooth connected'. In Bluetooth mode, the shuffle option only works in an individual folder, it will shuffle each folder one by one. It cannot shuffle all the songs.

4. The next time you access Bluetooth icon on the MP3 player, it will automatically connect with the previous paired device. (Make sure the previous paired device is under pairing mode.

5. If the Bluetooth feature does not work on your player please contact us for help: leo@agptek.com.

● The player cannot playback OGG or AAC files when under Bluetooth mode.

● Playlist is not supported under Bluetooth mode.

● The workaround to shuffle all songs: Put all of our songs into one folder (Music) to get the songs to shuffle when in Bluetooth mode.

Transfer files to your player

1. Connect it to the computer with the enclosed Micro USB cable, the MP3 player will show up as a removable disk as soon as the computer recognize it and then just drag files onto the MP3 player. If your computer cannot recognize the player, the enclosed Micro USB lead may has problem please use another Micro USB lead to connect it to your PC.

2. When the slider is "off" the unit will power up when connected to a USB port, and then go dead when disconnected. Slide the switch of the opposite position it will power up OK.
Note: if there is the "Disk error" showing for your device, please connect your player with the computer, and then format the disk with "exFAT" option.

Right-click your device on computer, and then choose the item "Format" with exFAT option

Video and radio

1. Video

Hold the left key to fast
rewind, tap to the previous
video

Hold the right key to fast
forward, tap to the next
video.

Tap the bottom Key and then
repeatedly tap the Left Key to
get back to Main Menu

Note: The product only support 160*128 video, you may convert video files to this format
by the tools included in the device.

● To use the "am transform" included in the device

Install the program on your computer first, and press
the icon [icon] to choose the file you want to convert
on your computer, and choose the icon [icon] to put
the converted video in the file on your A06 player.

Choose the icon [icon] to start convert, the bottom
will show the progress of converting for the icon[icon], it will be ok until it showed 100%.

2. Radio

You can adjust the radio through "Manual tune" or "Auto tune", press the button [icon] and
[icon] for rewind and forward search one by one, and long press the button for searching

automatically, then press the button ⏯ to stop on the channel you like. Press the button

▶ to start FM recording.

Please kindly note that you can only listen to mono radio station on this player!
# Recording and E book

1. Recording

On main menu, press the central key to enter Record, start language record/record

library/record format/record setting/, press the central key to enter after choose.

Press VOL key and then choose "yes" to save the recording you want

2. E Book

On main menu, press the central button to enter E book function, Press the button ⏭ and

⏮ to turn the page up/down. Please note it only supports "txt" format for your reading.

Please note: if you can't read your txt document through E book, connect your player to

the computer, and then choose the file for the item "save as", select the code as "UTF-8"

and save. Copy the txt file to E-Book folder and it will back to normal condition for your reading.

FAQ and Supports

1. How to use playlist
● To use the preset playlist

Press the button when it's on the main playing screen, and then choose the option "Add to playlist" for the song you want to operate with. There are 3 items prepared for you, including "Playlist on the go [1]", "Playlist on the go [2]" and "Playlist on the go [3]", you can add the song to any one of these three as you like.

● To create the playlist by yourself

Editing Playlist by media player could be painful, no matter by iPod or others. There is a free program called Media Go. It's the easiest program to use for transferring playlists to the AGPTek. Just create your playlists in Media Go and then right-click its name and select 'Add playlist to X :(Which is your MP3 player's disk) '. (You can download it at http://mediago.sony.com/chs/download)

After sending your playlist and music to the player, you may find it in "Music", and then select playlists.

Attention: Playlist is not supported under Bluetooth mode.

2. How to organize you music in order

1. Play from playlist, the order is the same as the playlist you created them. (Bluetooth mode doesn't support playlist)

2. Play from Music option, the order is sorted by alphabet (or exactly called ASCII)

3. Play from Folder option, the order is sorted by the order you copy them. Before you copying them into the player, please arrange the files to a right sequence in computer (by name, like the picture below. Not by #).

If the file order is sort by name before you copying them into the player, they would be right order.

Note: To check the music you have arranged by name on your compute, you should open the "Music" of your player, and then just enjoy it.

4. Renamer

If your music is not sort by the right number, use the application "Renamer" to sort by number. Download Renamer on the website (http://renameapp.codeplex.com/documentation), and then choose the item "Add folders" or "Add files" to add your music into list. You can set as the picture shows to number your music by sequence, and then choose the item "rename files" after you have arranged your music in right order.

Note: To check the arranged music you have done, you need to open "Folder" of your player, and then you can enjoy your music as the arranged order.

3. How to load tons (2000 up) of Music

Make separate folders in card and drop your tracks into them. You can do this on your PC in windows explorer.

Please kindly note that the player can only see a max of 4000 tracks!

4. How to load APE (Lossless) music

An entire multi-track audio CD may be ripped to a single audio file and a cue sheet. However software audio players and hardware digital audio players often treat each audio file as a single playlist entry, which can make it difficult to select and identify the individual tracks. A common solution is to split the original audio file into a series of separate files, one per track.
Step 1; Download TT player via http://images.agptek.us/image/TTPlayer.rar. And then add your APE music into TT player.

Step 2; Select the music you need to convert, and then right click, choose "Convert Format".

Step 3; Now Choose "Monkey's Audio (APE)" and sampling rate conversion from 44000 or 48000 Hz, and then "Convert now"

Step 4; when the conversion is finished, put the split APE music into your MP3 player. Now, enjoy your music!

5. Why I can't connect it with phones

You cannot connect this player with your phones nor tablets, because most of phones or

tablet doesn't work as a Bluetooth receiver, but transmitter. You can connect it with your Bluetooth speaker or Bluetooth earphones.

6. Format Supported

music format	MP3/WAV/APE/WMA/FLAC etc.
Video format	AMV（converted video)
Picture	JPG/JPEG/BMP
E-book	Support TXT
FM radio	Support Radio
Lyrics display	Support LRC Lyrics
Recording	WAV

7. How to sort music in SD card by artists, albums and genres

1. Insert your micro SD card into the player

2. Find "Folder" icon and select it, then the player display two folders "Local folder" and "Card folder" and play one song from the card folder.

3. Press VOL to exit from the song screen and use left double arrow key to go back to the main menu.

4. Access "music" icon and you can see all the tracks on your micro SD card and sorted by artists, albums and genres.

Note: The 'Music' option can only show music on the internal memory or the card memory but not a combination of both

8. How to listen to FM Radio via Bluetooth

1. Firstly, connect the earphone and use it as an antenna (Even you don't use it). Then please follow up the steps: FM radio -> Users -> Select any frequency -> Click button "M"->

2. Choose "Bluetooth link" -> pair your Bluetooth speaker with the player

Note: the player won't connect you BT device automatically in this condition, you need

When the player is in Bluetooth mode, can you shuffle or repeat music?

Yes, press "M" button, and the player display three options "shuffle", "repeat" and "equalizer".

Precautions

1. Please try another USB cable such as your android phone cable if the computer can't recognize the MP3 player

2. When the device freezes, turn it off, and then restart it.

3. When the device only plays each song for 10 seconds, turn off the slideshow feature. (If you choose 'view playing' for the selection "Repeat" in paly mode, it would only play the first 10 seconds of a track and then skip.) Or you may restore to factory's setting (in the setting).

4. Please check whether your player is power-off when the player doesn't turn on, or you can charge it for one hour in case of lower power.

If the player still can't be used after charging, please contact with our customer service.

5. Serious Noise

● Please check whether the headset is clean or not, the dirty will cause noise.

● Please check whether the music file is damaged or not, please try another song for testing. The damaged music file may cause serious noise.

6. No sound in headset

● Please check whether the voice volume is setting up at 0

● Please check if there is any problem about the headset connecting.

7. If the device could not recognize a Micro SD card, check if you switched from local

folder to card folder. If it still doesn't work, you can check if it had been formatted in

FAT 32. Format the card with the option of EX FAT.
