AGPTEK

User Manual

R1SB Music Player

About the manuals

This User Manual only describes the basic operating instructions.
For detailed information and operating instructions, you can access to the online Help Guide (Full version) using various devices from www.agptek.com.
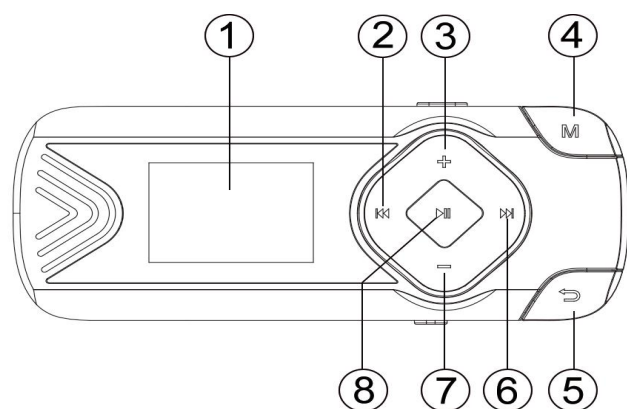

About the Operating System
Make sure that the OS is
Windows98/ME/2K/XP/SP2/Vista/Linux6.2/Mac OS 10.3.

Charge the Player
1.Use 5V/500mA charger (Not included)
2.By connecting to a computer with the included USB cable
The battery for your player is recharged while the player is connected to a running computer.
Note: If you charge your player when it has not been used for a long period of time, your computer may not recognize it, or nothing may appear on the display. Charge the player for about 10 minutes, after which it should start operating normally again.
If the display of the player remains blank for more than 10 minutes, disconnect the player and press the RESET button to reset the player.
If you turn on the computer, restart the computer, shut down the computer, or wake up the computer from Sleep or Hibernate status while your player is connected to the computer, the player may malfunction. In this case, disconnect the player and press the RESET button of the player with a pen or paper clip to reset it. Disconnect the player from the computer before performing these operations.
To prevent battery deterioration, charge the battery at least once every half a year or every year.

Parts and Controls

Front   **Rear**

1. Display

Note: Always put the lyric file and the music file in the same folder.

Importing and Transferring Music

You can transfer musk (WMA or MP3 codec) into [MUSIC] folder on you player by dragging and dropping it in Windows Explorer on your computer. Note: Do not disconnect your player while files are being transferred. If you do, the file being transferred will be damaged.

You cannot transfer music with copyright protection since your player does not support it.

Help and Troubleshooting

● Can't turn on the player

- Please check whether the player is run out of battery, connect the player to a adapter and try again after charging.

● Can't hear any sound from the player

- Please check if the volume is set to 0;

- Please check if the earphone is in poor contact with the player.

● Heavy noise when playing music

- Please make sure the plug is clean or this may cause noises;

- Please check if the music file is damaged. Try to play other musics to confirm. Damaged files may lead to heavy noise or skipping.

● Can't download file from computer

- Please confirm whether it's connected properly;

- Please check whether the storage space of the internal memory is full;

- Please check whether the USB cable is damaged.

● I cannot charge the battery.

- Disconnect the player, and then reconnect it.

- Charge the battery is in an ambient temperature in the range of 5 °C (41 °F) to 35 °C (95 °F).

- Turn on the computer.

- Release the computer from Sleep or Hibernation status.

● **[Connecting USB] does not appear when your player is connected to the computer.**

- Disconnect the player, and then reconnect it.

- Disconnect your player, wait a few minutes, and reconnect it. If the problem persists, disconnect the player, restart the computer, and then reconnect the player.

- Connect your player to another USB connector on your computer.

- If you charge your player when it has not been used for a long period of time, your computer may not recognize it or nothing may appear on the display. Charge the player for about 10 minutes, after which it should start operating normally again.

● **Your player becomes unstable while it is connected to the computer.**

If your player does not function as expected, try the following steps to resolve the issue.

1. Connect your player to your computer to charge the battery.

You may be able to resolve some issues by charging the battery.

2. Press the RESET button with a pen or paper clip, etc.

Before resetting your player, disconnect your player from your computer and check that no song is being played back. You can then reset the player safely. After resetting the player, hold the power button to turn on the player.

If the approaches listed above fail to resolve the issue, please contact support@agptek.com.

About the headphones

Avoid playing the unit at so loud a volume that extended play might affect your hearing.

At a high volume outside sounds may become inaudible. Avoid listening to the unit in situations where hearing must not be impaired, for example, while driving or cycling.

As the headphones are of open-air design, sounds go out through the headphones. Remember not to disturb those close to you.

About the in-ear headphones

The earbuds seal your ears. Therefore, be aware that there is a risk of damage to your ears or eardrums if strong pressure is applied to the earbuds, or the earbuds are suddenly removed from your ears. After use, be sure to take the earbuds off your ears gently.
